VetraNet-S-Series

Sentech's VetraNet S-Series point support system is specifically designed to enclose spaces requiring minimum structure. The system can be used for walls up to 50' tall using one-way cable arrangements. The VetraNet S-Series fittings are designed to be used on walls with single plane or single curvature geometry. The system allows each panel to be supported independently; the glass gravity loads are transferred directly from the glass to the cables via the fitting connections.

- ✓ **316 stainless steel construction**
- ✓ **One-way cable arrangements**
- ✓ **Maximum wall height for one-way cables= 50'**
- ✓ **Designed for all tempered glass types (IGU, laminated, or monolithic)**
- ✓ **Recommended maximum panel aspect ratio= 1.3**
- ✓ **Recommended maximum cable spacing= 6'**
